

## Softboxes

An innovative shelf system. Any form can be upholstered with drapery. The core consists of a medium density fiberboard, strengthened with felt and stuffed with cotton wool.

Imagine any colour combination or variation of materials. The outer surface could as well be made of cloth; the inner cover might also be covered with leather.

The shelf system can be adopted individually to any room concept.

Measure (see example in picture 1):

Width: 40 cm

Height: 30 cm
